

## IMPORTANT!! READ FIRST

I've treated your paddle with mineral oil when I made it. This has a tendency to weep for a few days following application. If you notice wet, shiny spots this is nothing to be concerned about. Simply use a dry soft cloth or paper towel and wipe the paddle.

## PIZZA PADDLE MAINTENANCE

I've had 2 paddles in operation in my kitchen for about 10 years and have done little to them. Normal handling seems to keep mine from appearing dried out. If you'd like to refresh your paddle, clean and allow your paddle to dry. Wipe on a coat of mineral oil to saturate the surface. Leave for 10 minutes and remove excess with dry cloth or paper towel. You're ready to go again.

*Cleaning:* Paddles can be washed with a dish cloth wet with soapy water and rinsed with water after. Dry paddle with a cloth and allow to air dry. Never immerse your paddle in water, leave in a puddle on the counter or place in the dishwasher. Paddles are natural wood and will not last if you do these things.
