

ROLLING PIN MAINTENANCE

I finish all my rolling pins with a Beeswax/Mineral Oil mixture. This brings out the natural beauty in the woods with the colours and grain structures. It's foodsafe and smells like honey. No further finishing or treatments are necessary but if you want to renew the look of your rolling pin at anytime, clean as per below and add a fresh coat of this mixture. It's easy, just wipe on and wipe off the excess. The finish is Clapham's Salad Bowl Finish. You can purchase it from me but it's also available at many retail stores.

Cleaning: Rolling Pins can be simply wiped off with a damp cloth or washed with a dish cloth wet with soapy water and rinsed with water after. Dry your pin with a cloth and allow to air dry. Never immerse any of my products in water, leave in a puddle on the counter or place in the dishwasher. All of my products are natural wood and will not last if you do these things.
